

## Work Experience

- |   |                  |                                  |                            |
|---|------------------|----------------------------------|----------------------------|
| <b>Box Labs</b>   | Toronto / Remote | <i>Software Developer</i>        | <i>Sept 2020 / Present</i> |
| <ul style="list-style-type: none"><li>– Creating data visualizations with Python and JavaScript to inform them about their health risks</li><li>– Converting markups in Zeplin and Figma to functional UI to increase application features</li><li>– Building test environments to assess for code scalability, and formatting to improve user experience</li></ul>   |                  |                                  |                            |
| <b>National Research Council</b>  | Ottawa           | <i>Web Application Developer</i> | <i>Jan 2020 / Aug 2020</i> |
| <ul style="list-style-type: none"><li>– Testing, observing and deploying data visualization systems to production servers increasing the usability of data by 14%</li><li>– Creating data visualizations and machine learning tools with JavaScript to slash energy usage statistics, consequently reducing expenses by 20%</li><li>– Employing the use of data structures in JavaScript to reduce repetitive code by 12% and increase scalability of algorithms by 16%</li><li>– Communicating with clients through technical guides to present the product and increase client satisfaction</li></ul> |                  |                                  |                            |
| <b>Mirrabel Inc</b>   | Toronto          | <i>Software Developer</i>        | <i>May 2019 / Aug 2019</i> |
| <ul style="list-style-type: none"><li>– Diligently worked to manage the back-end of the website in Python and reduced runtime errors by 40% to allow faster website performance</li><li>– Produced a Shopify application by designing the user interface with React.js, and a functional backend with Express and NodeJS</li><li>– Analyzed user data with Python and Matlab to decide how well existing e-commerce stores were gaining success from using the app</li></ul>  |                  |                                  |                            |

## Projects

- uOttaFit** JavaScript, Python <https://github.com/setupotnis/uOttaFit>  
A full stack application, made with PyTorch and JavaScript, which prompts users on how to perform weightlifting exercises without becoming injured and achieved top 5 out of 177 participants for creating technology which improved health and wellness of users

## Skills

**Fluent Programming Languages** JavaScript, Python, Matlab

**Frameworks** Django, Flask, ReactJS, Express

**Libraries** PyTorch, TensorFlow, SciKitLearn

**Web Technologies** REST, HTML5, CSS, MongoDB, Firebase, Azure

## Education

**University of Waterloo**  
*Bachelors of Applied Science Nanotechnology Engineering*

Waterloo, Ontario  
*Sept 2018 / Apr 2023*
