

SETU POTNIS

Engineering Undergraduate

SKILLS

Working knowledge in :

- JavaScript, HTML, CSS
- Python, C, Node.js, R, MatLab
- Git

- Able to work in a team to solve problems
- Effective Oral and written communication
- Fluent in both English and French

Community Outreach Blog:

RELEVANT COURSEWORK

- Data Structures and Algorithms, Computational Methods, and Fabrication
- Employed regression models in MatLab to through an arbitrary amount of data points

HARDWARE

- Circuit experience with breadboards, inductors, and capacitors for RL and RC circuits
- Experience with an oscilloscope through labs in order to measure square, sinusoidal, and triangular waveforms

WORK HISTORY

Web Application Developer

National Research Council | January 2020- April 2020 | Ottawa

- Testing, deploying and observing data visualization systems to production servers which increased data usability for clientele by **26%**
- Creating data visualizations with d3.js to provide further machine learning tools such as energy usage statistics to reduce expenses by approximately **30%**
- Employing the use of data structures to reduce repetitive code by **23%** and reduce time complexity of algorithms to optimize for scalability
- Communicating with clients through technical guides to present the product and increase customer satisfaction by **68%**

Software Developer

Mirrabel Inc | May 2019- August 2019 | Toronto

- Diligently worked with the CTO to manage the backend of the website and reduce bugs by **40%**
- Produced a Shopify application by designing the user interface with react.js and redux
- Integrated Shopify API to permit existing e-commerce cosmetic stores to acquire **90%** better-targeted sales and data through direct marketing
- Automated email marketing in python to grant quicker access to cosmetic partnerships

PROJECTS

Smart Mirror

(September 2019 - Present)

- Constructing a smart mirror mobile application with Flutter and a Raspberry Pi used to create a more personalized home atmosphere
- Enhancing smart mirror experience by using open source software such as Spotify and Amazon Alexa Open APIs
- Wiring the Raspberry Pi with a LCD display and a microphone in order for voice commands to be accessible

Community Outreach Blog

July 2019 - Present | Instagram

- Set up @cs.software_ to share my ideas about software and to inform people about its potential
- Produced daily posts through graphic design software to explain software design concepts to followers
- Initiated a niche instagram engagement group to boost impressions by **130%** to a wide range of audiences

React Recipes

July 2019 | Waterloo

- Designed a react.js application to call for recipes from an API in order to further personal knowledge of React and learn more about different cuisines

EDUCATION

Candidate for Bachelor of Applied Science | Nanotechnology Engineering

University of Waterloo (Class of 2023)
